Body:

```
1 {
2   "customer": "Ravi Kumar",
3   "email": "ravi@gmail.com",
4   "product": "Laptop",
5   "quantity": 2,
6   "price": 55000
7 }
```

N8N INVOICE GENERATOR AI AUTOMATION

Create web hook and configure as below

The screenshot shows the configuration for an n8n Webhook node. At the top, there are tabs for 'Parameters' and 'Settings', and a button labeled 'Listen for test event'. Under the 'Parameters' tab, the 'Webhook URLs' section is expanded, showing 'Test URL' and 'Production URL' buttons. The 'Test URL' is set to 'http://localhost:5678/webhook-test/invoice' with a 'POST' method. Below this, the 'HTTP Method' is set to 'POST', the 'Path' is 'invoice', 'Authentication' is 'None', and 'Respond' is 'Immediately'. A yellow warning box states: 'If you are sending back a response, add a "Content-Type" response header with the appropriate value to avoid unexpected behavior'. The 'Options' section shows 'No properties' and an 'Add option' button. At the bottom, there is a suggestion: 'I wish this node would...'.

Parameters Settings Listen for test event

Webhook URLs

Test URL Production URL

POST http://localhost:5678/webhook-test/invoice

HTTP Method

POST

Path

invoice

Authentication

None

Respond

Immediately

If you are sending back a response, add a "Content-Type" response header with the appropriate value to avoid unexpected behavior

Options

No properties

Add option

I wish this node would...

And run post man send request and here check listen for test event

Next attach node edit fields :
